I, Donald Abercrombie SMYTH, a registered medical practitioner of 82 Gallagher Street, Kambah was requested by First Constable S. AUSTEN to take a sample of blood from W/O REED and also record the extent of an injury to his neck.

I took 5ml of blood from a vein in his right arm and placed it in a vial previously labelled by me then handed the vial to First Constable D. CROFT.

My observation of the wound in the neck was that it was a wound over the upper fibres of the right trapezius muscle near the base of the neck. The wound had been closed by four sutures.
